

Statutory Inspection and Certification Services

The VELOSI Group has extensive experience in providing Statutory Inspection and Certification Services. We provide Manufacturing Certifications required for registration of statutory equipment and for obtaining a Certificate as required by the regulatory bodies.

BOILER & PRESSURE VESSEL CERTIFICATION AND ASSISTANCE SERVICES

With many companies competing in the global market, it is important to identify your product as a quality product. The American Society of Mechanical Engineers (ASME) Code symbol is internationally recognised for the highest levels of quality assurance and excellence of a product.

The ASME Stamp also leads to increased product acceptance by Governments, Industry, regulatory agencies, financial and insurance companies. The ASME Boiler and Pressure Vessel Code is by far the most popular standard acceptable world over.

The VELOSI Group offers a package of services that can improve product quality to achieve ASME Certificate of Accreditation and worldwide ASME code inspection services.

ASME AI- SERVICES

The VELOSI Group representing Seneca Insurance Company USA, offers ASME code inspection by providing the services of Authorized Inspectors (AI) and Authorized Inspector Supervisors (AIS).

ASME International

**MINISTRY OF
MANPOWER**

The AI services include:

- Review of design calculations and drawings for code compliance
- Inspection of materials and certificates
- Checking of material traceability during all stages of fabrication
- Ensuring that only qualified welding procedures, welders and NDT technicians perform the work
- Ensuring that the required hydraulic and pneumatic tests are done
- Ensuring that the vessel is identified with a proper name plate, code stamped and Certified

We provide immediate access to your Inspector/ Supervisor for prompt response to your technical and code interpretation questions, thus saving time and frustration in solving challenges.

VELOSI has developed and assisted numerous businesses in establishing Quality Control System and Audits leading to Certificate of Accreditation by ASME in several countries for Code Symbol stamps *U,S,A,PP,U2,T*.

We also offer Authorised Inspector services for the 'R' stamp to comply with National Board Inspection Code, USA for carrying out repairs/recertify in-service pressure retaining Equipment.

DOSH SCHEDULE IV

All pressure equipment manufactured or imported for use in Malaysia requires certification of the manufacturing process by third-party inspection organizations; these have to be authorized as 'Inspection Authorities' by the Department of Occupational Safety and Health or DOSH.

VELOSI is gazetted as an 'Inspection Authority' by DOSH under Schedule IV of Regulation 7 (2) (iv) of the Factory and Machinery Act 139.

Central Boilers Board – India

The Central Boilers Board of India, constituted under the Indian Boilers Act 1923 (5 of 1923) lays the standards for materials, design and construction as well as for the registration and inspection of boilers. The Board recognises VELOSI as an **Inspection Authority and Competent Authority** to inspect boiler materials and fabrication carried out outside India, including approval of welding methods and welders.

Ministry of Manpower – Singapore

VELOSI is accredited by the MOM for the design review, fabrication surveys, and certification of pressure systems during construction for all pressure Equipments which are imported into Singapore to ensure compliance with the Singapore Regulations.
